## DATABASES

### **As Police Deaths Mount, What Can You Do Now To Stay Safe?**

At the end of June, total duty-related fatalities in the U.S. are up 8% compared to the same time last year, according to preliminary figures from the National Law Enforcement Officers Memorial Fund. Officer murders from gunfire are spiking an alarming 38% increase. If trends hold through the second half of the year, we could see the worst annual toll in a decade. What behavioral factors may be influencing this disturbing surge -- and, specifically, what can you do right now to best avoid becoming one of the grim statistics? This document is located in the Core Database under document #617762.

### **Critical Incident Response Plan**

The purpose of this general order from the Garden Grove, California, Police Department is to provide guidance to department staff regarding response considerations when the Incident Command System is utilized during field response to critical incidents. This general order augments and provides supplemental considerations regarding natural and manmade disasters, civil disturbances, as a supplement to the City's Emergency Operations Plan and Annexes and other critical incidents that are not previously discussed in other Department orders, policies, or procedures. The full text of this policy can be located in the Policies Database under document #617857.
